We started using Platinum Software 3 years ago. We extended our shop which involved buying a lot more stock. We realised then that we needed a stock control system. The Platinum System enables us to book in and price up stock very quickly and easily as well as supply to our Workshop and book out stock to the Caravan Sales part of the business. The software can adapt to any part of the business. It is easy to use. The Staff are very helpful and we would recommend it to anyone.
