

## Platinum 4.5.7 and Platinum Online 2.14.10

---

### Platinum Desktop Updates

Nominal Ledger has been enhanced to support account numbers beyond previous limits, allowing greater scalability for financial structures.

Payment Links documentation and formats have been finalised, providing a more consistent and reliable experience when issuing payment requests.

Updated Platinum graphics for 2026 have been applied, refreshing the overall look and feel of the system.

---

### Platinum Online Updates

Check Sheets now support drag-and-drop reordering of questions, giving users more flexibility when designing workflows.

iOS users can now access a print preview and generate PDFs for check sheets, improving usability on mobile devices.

Finance can now be applied directly to a deal within Unit Sales Online, streamlining the sales process.

PDI records are now created automatically following deal authorisation, improving workflow efficiency and reducing manual steps.

---

### Bugs Resolved

Resolved an issue where Fiserv payments could become stuck in a loop on non-Clover terminals.

Improved handling of Nominal Review ensures that account numbers exceeding eight digits are now displayed correctly.

Fixed a problem where the print button was missing from Unit Sales documents.

Corrected an issue preventing Proof of Delivery images from being imported into the system.

Resolved an issue where check sheet mileage updates were not correctly applied to workshop jobs.

Fixed an issue where stock check items were incorrectly shown as being below the reorder level.
